Technical Assessment

R12 - Burp Suite Crawler Vs Curl web. Vs Intruder Spec - Burp suite is a GREAT crawler

Anna Bain

Which of the following is a tool for mapping web applications and uses various techniques to crawl?

- Burp Editor
- Burp Intruder
- Burp Repeater
- Burp Proxy

Clear selection

Which of the following bypass application attack scrambling Burp proxy?

- It is same to modify the http request easily.
- It is similar to curl but with application fuzzing.
- Cut trailing multibyte extensions.
- All of the above

What is the use of Throttle in Burp Suite Intruder tab?

- Delay Burp intruder to stop the amount of Burp intruder from requests
- Delay Burp intruder to avoid the amount of requests given in 1 milliscond
- All of the above
- None of the above

Which vulnerability is prevented by Date Based Access Control?

- Failure to control API access
- Unauthorized Sessions or Cookies
- Security Misconfiguration
- Insufficient Transport Layer Protection

The role of "Sniffer" is:

- Responsible for the interception of the request
- Allows to quickly add intercepted data to Burp Intruder Intercepted of messages.
- Displays the HTTP status code of the current request
- None of the above

When this web application has given randomness of session tokens than the Flow Sequencer is:

- Unauthorized Sessions or Cookies References
- Session Hijacking
- Session Fixation
- Session Hijacking

Secured communications should be established so that users can accomplish their tasks. Non-secret access only current resources that are not necessary to that:

- A hacker cannot steal a legitimate user's identity
- Users will not have access to and misuse system resources
- Only the resources authorized for that user will be at risk
- Hackers will not pose as legitimate users

The Common Field used in Intercept tab of Burp Suite is used to:

- Edit the message
- Shows a series of editable entries that can be performed on the currently displayed message.
- Used to add a command to intercepting items, to easily identify them later.
- Both 2 and 3

When HTTP cookies with tokens are not flagged or secured the Attack that allows is:

- Session Hijacking
- Insecure Cryptographic Storage
- Access control violation
- Session Hijacking

What part of the tasks related to Burp Proxy for Intercepting and manipulating HTTP requests?

- Intercept and modify all HTTP traffic passing in both directions.
- Test for bugs that are commonly not picked up by scanners.
- Burp proxy is used to test basically for requests and responses.
- None of the above

In this attack a user's session credential or session ID is forced to an explicit value:

- Session Fixation
- Session Hijacking
- Brute Force Attack
- Sidebands Attack

Clear selection

The following vulnerability was removed from OWASP 2021:

- Unvalidated redirects and forwards
- CSRF
- XXE
- SSRF

Burp Suite is an integrated platform for attack:

- Client
- Server
- Browser
- Web Application

Clear selection

Which of the following can lead to exposure of sensitive data?

- Session Fixation
- Improper Authentication
- Insecure Cryptographic Storage
- Unvalidated redirects and forwards

The attack in which code does not transfers by altering backend database queries through injecting manipulated queries?

- LDAP Injection
- Dos Injection
- XML Injection
- SQL Injection

The Intercepted Request in Intercept tab of Burp Suite is used to:

- Edit the message
- Shows a series of editable entries that can be performed on the currently displayed message.
- Used to add a command to intercepting items, to easily identify them later.
- None of the above

OTP Bypass, Captcha Bypass, 2FA Bypass, Common Password Hole Force are examples of:

- Broken Authentication
- Broken Access control
- Using Components with known vulnerability
- Security Misconfiguration

What does OWASP stand for?

- Open Web Application Security Project
- Operational Web Application Secure Project
- Open Web Application Security Project
- Open Web Assessment Security Project

If an attacker finds a Zero Day exploit of a vulnerable software which category it will contain?

- Insufficient Logging and Monitoring
- Using Components with known vulnerability
- Security Misconfiguration
- Sensitive Data Exposure

What is the role of sequencer in Intercept tab/application in Burp Suite?

- They have a custom tracker for application security.
- It defines the application's attack tactics of sessions.
- It maintains the application's pressures for data security.
- Both 2 and 3

Which of the following feature is present in Burp Suite Pro but not in Burp Suite Community?

- Burp Collaborator
- Intruder cookie Vars
- Throttle
- All of the above

XSS can be prevented by:

- Filter Inputs and escape Outputs
- Disable CCS
- Apply Rate Limiting
- All of the above

Burp Suite has the ability to Fuzz in spell auto. This can be done by:

- Burp Fuzzer Options
- Burp Intruder
- Burp User Options
- Burp Logger

Burp includes an in-built Fuzzer (Intruder) tool by that you have same a scanner. What Intruder you do?

- Use the Burp to automating all the information
- Contact administrator for assistance
- Forward the result to others
- Screen the results to call you back

OSVDB + MITRE combined together is OWASP 2007 represents:

- Broken Authentication
- Broken Access control
- Security Misconfiguration
- Insufficient Logging and Monitoring

The History of requests can be viewed in:

- Intercept
- HTTP History
- Repeater
- Intruder

The Action in Intercept tab of Burp Suite is used for:

- Assembly the message to be fit to an Intercept.
- Screen and edit the message to send the message on to the server or browser.
- Shows a series of editable entries that can be performed
- Used to check proxy history

CORS comes under which category?

- Broken Access Control
- Broken Authentication
- Security Misconfiguration
- Insufficient Logging and Monitoring

What are the Intruder attack types when Burp does not intercept HTTPS requests?

- To check for known configurations
- To send Requests to a website as your browser
- To request additional memory for Burp by starting Burp from the command line using -mx. Burp argument
- Both 2 and 3

The following attack can cause an action to the user's browser and is capable of disclosing user sessions, or embedding the user into malicious code?

- SSLI
- XXE
- Open Redirect
- CSRF

Burp Scanner is backed by _____ in the Heroest version of Burp Suite ?

- Burp Crawler
- Burp Scale Pro
- Burp Spider+
- Burp Crawler++

The following is true about Crawler Bomb attack ?

- It uses random generated URL
- The total number of requests generated by the attack is the product of the number of parameters
- Both 2 and 3
- None of the above

Which of the following bypasses the Crawl Rule in the Free Vs paid Crawler?

- Session Hijacking
- CSRF
- Dos Injection
- XSS

Which of the following tab is used to compare two requests in Burp Suite

- Comparer
- Collaborator
- Comparer+
- Sequencer

Which of the following is used for web application mapping ?

- Proxy
- Spider
- Scanner
- All of the above

The role of Burp Suite proxy in handling requests in web applications is ?

- Manages the configuration of the application.
- Loop cells run by default for handling web apps.
- Acts as a middle man for the Burp Suite for the responses and requests that pass through web proxy tools.
- All of the above

Which tab allows you to decode a string ?

- Decoder
- Repeater
- Jdcpie
- All of the above

The following vulnerability was added in OWASP 2017 :

- XXE
- XSS
- CSRF
- All of.

The following statement is false about request manipulation in Burp Suite :

- Burp Repeater is used to modify the offline requests then repeater of Burp Suite is used to send the modified requests to the server.
- The Scanner tool is used to identify the offline requests taken by a response and find out vulnerabilities.
- Burp Repeater is used for manually amending and modifying individual requests of interest.
- Burp Scanner is an HTTP/S intercepting proxy server for testing and attacking web services on the web.

Jsonp(callback=alert) changes connections from HTTP to HTTPS. Assume session identifiers are being changed and Flow Sequencer?

- Session Hijacking
- XSS
- Session Hijacking
- CSRF

Which of the following bypass true above URI with Burp Repeater tool?

- This tool checks the cross site scripting vulnerability.
- This tool takes a pre-certain time for code 0 check this vulnerability.
- It is a port used for administration of the web applications.
- Both 2 and 3

The vulnerability when unvalidated user-entered data is entered is ?

- SSRI
- Injection
- CSRF
- Insufficient Transport layer protection

Following are examples of Sensitivity Data exposure ?

- Unhash Values and Salt Input
- Sensitive Values displaying in Google
- Internal Jira Dashboards
- All of the above

Cookie can be affected by:

- Computer Virus
- Web Application Bug
- A file that is stored in a cookie is a Web site and browser
- A file that tracks as to visual your activity

Which of the following bypass current attack Burp suite: bypass through using in web application?

- It is same to tool the web application.
- It is used to check the session tokens management for the users.
- All of the above

Whose processor stores not check for proper validations and accepting the attack performed ?

- Cross Site Scripting
- Cross Site Request Forgery
- XML Injection Attack
- Sensitive Data Exposure

The vulnerability propagated when authentication of user for direct reference to internal objects is not validated is ?

- SSLI
- XSS
- SSRI
- All of the above

Which of the following bypass application for %0Cassdfsdf%0Cxxx0Ccc Vs %0Cxxx0Cxxx0Cxxx?

- This may be the protein element in the location of the site.
- To operate Burp Suite automatically to run the command/parameters and switches like -mx -Xmx -Xms -Xmn -Xss -Xoss -Xss -Xss
- All of the above
- None of the above

What is Phishing ?

- Data Tampering Attempt
- Email Scam
- Network Hacked
- Cross Domain Scandal

Which of the following options provides you with a server? ?

- Burp Repeater
- Burp Server
- Burp Collaborator
- Both 2 and 3

A copy of your responses will be emailed to the address you provided.
