

Challenge Name:- Raccoon (OSINT)

Description: My friend is an animal lover and she loves little animals. She even has a pet raccoon named "racckoonn". Silly but cute. She often posts pictures of her pet but I can't seem to find her or her pet's presence online anywhere!! Can you help me find it?

Solution:

The question starts with giving us the name 'racckoonn' and since it is an OSINT question, my first instinct would be to search for accounts on various social media platforms

After some research, you will come across an account on Instagram with the same name
<https://www.instagram.com/racckoonn>

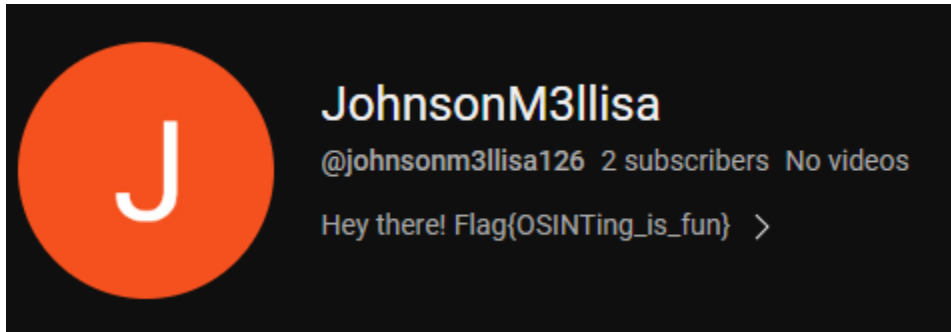

Looking through the account, We can see that in their bio, it's written that "@johnsonm3llisa126" is the raccoon's mother and that she has a YouTube channel.

Going to YouTube and typing the username like

Address: Office 405, Pearl Plaza, opp. Andheri Station Road, Railway Colony, Andheri West-58

Website: <https://www.hacktify.in>

"<https://www.youtube.com/@johnsonm3llisa126>",

We came across a channel and here we have the flag in the "About" section:-
